PROFESSIONAL SUMMARY

Entry-level Software Engineer with hands-on experience in **Python**, **REST API development**, **Django**, and **SQL** database management. Proficient in building scalable backend systems using Django REST Framework and FastAPI. Demonstrated ability to develop, debug, and document production-ready web applications. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and Agile development practices. Passionate about writing clean, maintainable code and delivering efficient software solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL **Frameworks & Libraries:** Django, Django REST Framework, FastAPI
Web Technologies: HTML, CSS, REST APIs, JSON **Databases:** MySQL
Tools & Platforms: Git, GitHub, VS Code, Version Control
Core Concepts: OOP, Data Structures & Algorithms, Debugging, Agile/Scrum, API Integration, Code Reviews

EXPERIENCE

Software Engineer Intern March 2025 – September 2025
Tudip Digital Pune, India

- Developed and maintained **RESTful APIs** using **Python**, enabling seamless backend communication and improving overall system reliability.
- Designed and executed optimized **SQL queries** to manage, retrieve, and manipulate data from relational databases in support of backend operations.
- Identified, debugged, and resolved software defects through systematic **code reviews**, ensuring high code quality and adherence to development standards.
- Authored comprehensive **technical documentation** for APIs and backend modules, and presented project progress to stakeholders clearly and effectively.

PROJECTS

Little Lemon | *Django, SQLite, Python, REST API, Django ORM, Authentication*

- Designed and developed a full-stack **Django** web application with **SQLite** to manage restaurant reservations and menu viewing, implementing user authentication, backend business logic, and frontend integration.
- Optimized database queries using **Django ORM** and indexing techniques to improve retrieval efficiency, and applied structured testing and debugging to ensure reliable application performance.

HealthWallet | *Python, Django, MySQL, SQL, RBAC, Secure Data Storage*

- Developed a secure web-based platform to store and manage personal health records, implementing structured data storage, file upload functionality, and efficient organized record retrieval.
- Designed a normalized **relational database schema** with **role-based access control (RBAC)** to ensure data security, input validation, and scalable record management for end users.

EDUCATION

PBR Visvodaya Institute of Technology and Science Jan 2021 – May 2024
Bachelor of Technology (B.Tech) – Computer Science and Engineering CGPA: 7.9 / 10

CERTIFICATIONS

• **J.P. Morgan** – Software Engineering Job Simulation • **Python Full-Stack Developer** – Version IT
• **FastAPI** – Simplilearn • **Django 101** – Simplilearn
• **Introduction to Python** – Saylor Academy • **JavaScript** – CS50

ACHIEVEMENTS & ADDITIONAL INFORMATION

- Solved **50+ problems** on LeetCode focusing on Arrays, Trees, Graphs, and Dynamic Programming, demonstrating strong algorithmic problem-solving skills.
- Built and deployed multiple full-stack web applications independently using **Git**-based version control workflows and **Docker** for containerization.
- Strong written and verbal communication skills with a proven ability to collaborate effectively in team environments and present technical work to non-technical audiences.
